PROFESSIONAL SUMMARY

Motivated NUS Graduate Diploma in Systems Analysis student with hands-on experience in full stack web development and system integration. Skilled in React.js, Node.js, and Python, with a strong foundation in database management and DevOps practices. Passionate about building scalable software solutions and contributing to digital transformation projects in Singapore's tech industry.

EXPERIENCE

Software Engineer Intern

March 2025 – July 2025

Systems on Silicon Manufacturing Company (SSMC), Singapore

- Improved data scalability by re-architecting ETL pipelines using modular Python and Shell services.
- Enhanced integration efficiency between iSMRT and SAP ERP systems with optimized APIs.
- Achieved faster deployment cycles by implementing automated CI/CD pipelines on AWS and Azure.

Full Stack Developer

Jan 2020 – Dec 2023

Scala Communication, Myanmar

- Delivered 4+ full-stack web applications using React.js and Node.js, increasing system performance by 10%.
- Boosted data reliability by 30% through automated backend testing and real-time monitoring scripts.
- Mentored junior developers and led UI optimization that improved user retention across mobile platforms.

EDUCATION

Graduate Diploma in System Analysis

Aug 2024 – Feb 2025

National University of Singapore

Coursework: System Analysis, Software Engineering, Web & Android App Development, DevOps
Capstone: Developed a full-stack web application integrating React.js frontend and Node.js backend

Bachelor of Arts (English)

Sep 2014 – Dec 2018

Yadanabon University

Coursework: English Literature

PROJECT HIGHLIGHTS

Shopping Cart – e-Commerce Web app(Java, Sprint Boot, React JS)

FitBiz – Business Fitness Tracking System (Laravel, PHP, React JS)

ORDX – Health-care Survey System (Laravel, PHP, Node.js)

MovieVerse – Movie Database App (React, Spring Boot, Kotlin)

iSMRT & ATMC ETL Split – Python and Shell-based data automation project

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication

Database: PostgreSQL, Oracle SQL, MySQL

DevOps / Tools: Git, GitHub, AWS, Azure, CI/CD, VS Code

LANGUAGES, SKILLS & CERTIFICATES

Languages: English, Chinese(Advanced), Myanmar (Native), Japanese (Intermediate)

Soft Skills: Problem Solving, Agile Development, Team Collaboration, Communication

Certificates: Web Application Development, Android Application Development, Agile Software Delivery
